Amendments to Specification

Page 2, lines 15-19:

The startup problem has been partially solved by introducing the fuel into all of the fuel flow fields directly from the fuel supply pipe and extracting the fuel from all of the fuel flow fields directly into the exhaust, as disclosed in ~~copending U.S. patent application Serial No. 09/021,809, filed August 23, 2001~~ U.S. Patent 6,821,668.
